LABEL | ESTATE LABEL® Papers

There are few applications that ask more from a premium paper than a wine label. Multicolor printing, embossing, die-cutting, and foil stamping are common. High-speed bottling and packaging lines are unforgiving.

estate label® papers are the standard of excellence in uncoated label paper and complement the artistry behind premium beverages.

Features and Benefits

- Proven performance for over 40 years: ESTATE LABEL® Papers perform extremely well on high-speed presses and labeling lines, and easily accept offset and flexographic printing as well as specialty techniques such as engraving, embossing, foil stamping and die cutting.
- Manufactured with proven wet strength characteristics increasing resistance to tearing or shriveling in moist environments.
- Ready for glue-applied and can be converted for pressure sensitive equipment to serve all paper labeling processes.
- Featuring NEW bright Titanium White and NEW rich Black
- NEW 12 x 18 Digital pressure sensitive sheets in White, Bright White and Cream
- Wide range of versatile textures including NEW Martele, bringing new world style to an old world surface.
- Custom colors, finishes, weights and sizes available.

Meets Cobb and Sizing Recommendations

ESTATE LABEL® Papers are guaranteed to fall consistently within Cobb range standards. Paper that is outside the recommended range can absorb too much or too little moisture, which can result in label adhesion problems.

Bold numbers indicate grain direction | All items carton packed

For best results in the bottling line and for glue adhesion, we recommend printing labels with the paper grain direction wrapping around the bottle.

ESTATE LABEL® stocking items are available with Wet Strength.

Please check with your pressure sensitive converter for pressure sensitive ESTATE LABEL® Papers.
